By default, the Software uses the list price for a particular model number as the unit price for that particular model number on the bill of materials. List prices are subject to change by Lutron without notice.

By using the Software, you have the option to adjust the unit price for one or more particular model numbers in order to present a bill of materials for those model numbers at specific selling prices. No such adjustment, however, will reduce or otherwise change the actual price that you pay for product orders that you place with Lutron. The actual price that you pay for the product orders will continue to be your net price for the products. You are entirely responsible for and assume all risk for your use of the Software including, but not limited to, any and all price differences generated from your use of the Software.
